

Subject: Tech Committee Meeting Recap - 5/24/18
From: Chris Hamilton <chamilton@sau15.net>
To: AVS Technology Plan Committee <avstechplan@sau15.net>

Hello All,

I hope you all had a great weekend and holiday.

As we discussed in the last meeting, for this upcoming school year, proposing updates exisiting Device Use guidelines and executing a better coordinated effort when addressing damage to Chromebooks was discussed, in place of a Chromebook Insurance Plan. We will also hold students accountable for intentional damage to devices, noting students or households will be responsible for payment of intentional damage to Chromebooks.

With the Insurance tabled, we also agreed not to move forward with an optional plan for 6-8 Grade students to take home Chromebooks. Instead, we will continue with using Chromebooks at school only for the 2018-19 School Year.

Two new forms were also discussed:

- 1) A Damage Report to document details of damage to Chromebooks and verify if damage was accidental, or intentional abuse. (Updated document is included)
- 2) A Chromebook Conditional form to be reviewed and signed by students at the beginning of the year to note current condition of device. Andrea has an action item to work on this form.

Along with the Damage Report form, you will also find the updated Chromebook Plan Proposal.

Thank you all,
Chris
